

# STYLE CHOICES

## PICKET PANELS

ULTRALOX® aluminum picket railing systems offer a traditional accent to any home.

## CONTINUOUS RAILINGS

Use 2" posts with the picket rails to incorporate continuous top rails for a seamless look.

## FULL GLASS RAILINGS

Glass railing panels offer unobstructed views with an upscale look.

## GLASS STRIP

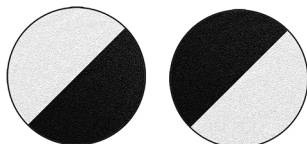

The glass strip railings add sophistication and a clear view.

## COLOR OPTIONS

BLACK WHITE BRONZE

PIANO TUXEDO

## ULTRALOX INTERLOCKING® TECHNOLOGY

produces a consistent and durable product which maximizes the advantages of other manufacturing methods, while omitting disadvantages.

## INDIVIDUAL POWDER COATED COMPONENTS:

AAMA 2604 powder is applied to the individual railing components by a certified architectural powder coating applicator. This ensures consistent quality and a durable finish.

**LOCAL AVAILABILITY:** This unique method of fabrication puts the control of supply at the local level, near the commercial project site.

**QUICK TURNAROUND:** Upon measurement of the project, materials can be fabricated and installed within days vs. weeks. This provides the ability to accommodate change orders or site changes on the same day if needed.

**REPLACEABLE PARTS:** If the railing is damaged, it can be replaced quickly without removal of the entire section.

**ICC-ES AC273 APPROVED:** Railing manufactured by the interlocking process is tested for quality and consistency.

**CONSISTENT ASSEMBLY:** Since the railings are assembled by the Ultralox Interlocking® machine, the quality of each assembly is consistent.

### STAIRS & ADA

Stairs are produced at 37° to accommodate stair applications ranging from 30-40 degrees. Choose a post to post design or opt for a seamless built-in handrail look. ADA handrails are fully compliant and can be installed in various design applications.

### GATES & LIGHTS

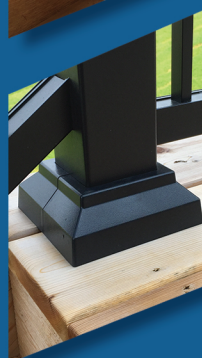

Gates are spring-loaded to safely close. High-quality hardware includes lock and key latch. Multiple lighting options are available to enhance the evening ambiance.

## PREMIUM DESIGN

ULTRALOX® Railing Systems hidden-fastener feature creates an upscale and seamless look.

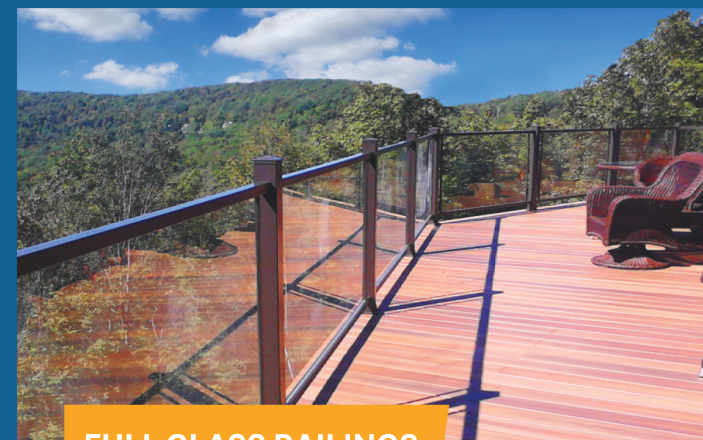

Choose the right look to create your ideal outdoor living space with any of the following ULTRALOX® products: Picket gate kits, low-voltage LED post cap lights and solar post cap lights. All are available to match any of our three standard colors.

It's easy to configure ULTRALOX® railing for your deck. Select from 6' or 8' rail/stair panels and number of posts. Components are packaged in convenient kits with everything required for installation. No need to worry about missing parts!

### GLASS STRIP RAILINGS

ULTRALOX® Glass Strip Railing Systems add a contemporary design to your deck.

### FULL GLASS RAILINGS

The clear difference! ULTRALOX® Aluminum 1/4" tempered full glass railing system offers a clear solution to a great view.
